

## Make a Bird Feeder

This is a fun and easy craft for your kids to do to make a simple bird feeder. Hang it on a bush or tree in near a window to see what birds you attract!

### What you need:

Pipe cleaners  
Plain Cheerios  
String

### What to do:

1. Start by having your child string cheerios on a pipe cleaner. You can string as many that would fit, leaving some space to bend your pipe cleaner.
2. Bend the pipe cleaner into a shape. You can do any shape you'd like: Square, heart, rectangle, star, etc. Be creative!
3. Once you're done, make sure to twist the ends of your pipe cleaner together.
4. Cut a small piece of string and tie a loop to one end of your pipe cleaner.
5. Using your string loop, hang your pipe cleaner bird feeder and see which birds arrive!
