

Egg Painting

This activity is a new spin on a painting project and gives you a colorful house decoration!

What you need:

Eggs

Large sewing needle

Bowl

Acrylic paint & paint brushes

Plate

Wire rack or dishrack

Egg carton or cup

What to do:

1. First, wash your egg well and let it drip dry on a dishrack.
2. Using a large needle, push it into one end of the egg and make a hole. Push the needle into the yolk to break it.
3. Make a small hole on the opposite end of the egg.
4. Blow into that small hole, holding the egg over the bowl. The yolk should come out the larger hole.
5. Carefully wash the empty egg. Let it drip dry on a dishrack.
6. Now you are ready to decorate! Place your egg in an egg carton or cup to keep it standing upright.
7. You can first lightly pencil a design on an egg. Maybe draw your favorite zoo animal!
8. Using acrylic paint, paint your designs on the egg. Be sure to let it dry before painting the bottom.
9. You are all done!
