

Frog Life Cycle

A frog lifecycle is unique—a young frog that hatches from an egg does not look like an adult!

Can you put the life cycle in the correct order? Print out this worksheet and cut out the five stages. Then, glue the life cycle in the corresponding boxes. You can find the answers in the key on our website.

Tune in to today's episode of Como Live at 1:30pm on Facebook to get a behind the scenes look at our Wyoming Toad tadpole project.
