

Handprint Penguins Craft

What you need:

- Black construction paper
- White felt (construction paper works too)
- Orange construction paper
- Two googly eyes
- Glue stick
- Pencil
- Scissors

What to do:

1. Have your child trace their hand on a black piece of paper. Make sure their fingers are spread slightly apart.
2. Help your child cut their handprint out of the paper. Flip the handprint upside-down so the fingers are pointing downward.
3. Cut an oval piece of white felt or construction paper. Make sure this piece covers most of the middle of the handprint, with only the fingertips showing.
4. Fold a small rectangular piece of orange paper in half. Cut out a "V" pattern along the edge of the paper with the opening of the "V" on the fold.
5. Now put your penguin together! Glue on the white front side. Arrange the googly eyes and orange beak to create your penguin's face. Glue them in place.
6. You are all done!

Tune in today to Como Live on Facebook at 1:30pm to get up close to one of our African penguins!
