

Grow an Instant Indoor Garden!

Next time you are chopping carrots, make sure to save the tops!
These make a great “instant garden” in a few easy steps you can do
with your kids!

What you need:

Full carrots with greens

Knife

Small pot with potting soil (6-inch pot works well)

What to do:

1. Cut off the tops of your carrots. Leave about 1 inch of the top of the carrot for planting. (Be sure to eat the rest of the tasty carrot!)
2. Plant your carrots in the small pot with potting soil. You don't want to bury them, but you want to make sure you have a small amount of the orange top showing.
3. Water your container. Make sure the soil is moist and not soggy.
4. Keep your container on a windowsill or bright, sunny window.
5. Watch your carrot tops grow into fun and interesting plants to brighten your winter!

Tune in today to Como Live on Facebook at 1:30pm for a virtual tour of “Part 2”
of the Sunken Garden Fall Flower Show!
